

## XEROX SECURITY BULLETIN XRX06-001

Vulnerabilities in the ESS/ Network Controller and MicroServer Web Server could potentially permit unauthorised access.

A Xerox Customer Service Representative must install System Software Version 14.027.24.015 or 13.027.24.015 (depending on whether the product is a WorkCentre® or WorkCentre® Pro, respectively), which incorporate fixes for these vulnerabilities and are currently in Common Criteria Certification. To initiate the request for either of these software versions, please contact Xerox customer support and request the solution for Security Bulletin Number XRX06-001.

### Background

System Software Versions 13.027.24.015 and 14.027.24.015 are undergoing Common Criteria evaluation. The software applies to the products listed below.

This system software version incorporates fixes for vulnerabilities in the ESS/ Network Controller and MicroServer Web Server code that could allow unauthorised access including:

- Vulnerabilities that could bypass authentication or allow unauthorised network access.
- Specially constructed Postscript request can cause denial of service.
- Cross-site scripting allowing contents of web pages to be modified in an unauthorised manner.
- Vulnerabilities that could reduce effectiveness of some security features.

If successful, an attacker could make unauthorised changes to the system configuration. Customer and user passwords are not exposed.

### Products Affected:

WorkCentre®	WorkCentre® Pro
232	232
238	238
245	245
255	255
265	265
275	275
